**More by Crazy Leprecaun:**

A 10x10 grid of binary code (0s and 1s) with some cells highlighted in blue. The grid is as follows:

1	1	0	0	1	0	0	1	1	0	0	0	0	0	0	0
0	0	1	0	0	1	0	1	1	1	0	0	1	0	0	1
0	0	0	0	0	0	1	0	0	0	0	1	0	1	1	0
0	0	1	0	0	1	0	0	0	0	1	0	1	1	0	0
1	0	1	0	1	1	0	0	1	0	0	1	1	0	0	1
0	1	1	0	0	1	0	0	0	1	0	1	1	0	1	0
0	0	1	0	0	0	0	0	1	1	0	0	0	0	1	0
1	0	0	0	0	0	0	1	1	0	0	0	0	1	0	0
1	0	0	0	0	0	1	0	1	0	0	1	0	1	1	0
0	0	1	0	0	0	1	0	1	1	0	0	0	0	1	1
1	1	0	0	1	1	0	0	1	0	0	0	0	0	0	0
0	1	0	0	1	0	1	1	0	0	1	0	0	0	0	0

System-Hidden-Files-and-Folders/)

Also, you might notice that I have a folder called "CommandLine." This is a VERY usefull program, and can be downloaded at <http://www.beyondlogic.org/solutions/processutil/processutil.htm> (<http://www.beyondlogic.org/solutions/processutil/processutil.htm>). There is also a hearty description at this page.

You made a whery nice tutorial, just saying. :)

But i have one question:

Dos the autorun file work on aple to?

Couse in my school we have almost only aple computers..... :/

{i dont like aple anyways}

Hey maybe you should focus on learning the english language at school and not try to hack a computer...

To get past the BIOS password, look up the manual to the computers (if branded models) or the motherboard (if custom built) and check to see if there is a procedure for clearing the BIOS password. If all else fails, switch the jumper by the CMOS battery, remove the batter, count to 20, put the batter back and put the jumper back where it belongs. Hope that helps.

I can't seem to hack a laptop with this. Could you please elaborate where I probably went wrong? I downloaded the files at the end, and I also downloaded the applications, but I don't know where the app data is.

Great tutorial, but I have one question:

If I create the exe, and open it on the attacked computer, do I need to save the exe on the victim's computer, or is it enough with opening the exe? After using metasploit, as I am waiting for the victim to open the exe, can I turn off the attacker computer where I am running Kali Linux? I will lose the attacked? Could I save it somehow? After the victim opens the exe, if he turns off the victim's computer, will I lose the attack? If I can enter a USB in the victim's computer, is creating a backdoor the easiest way to access his computer, or is there any other easier way? Thank you for your help!

The autorun inf file u made won't work in win 7 os

Please give an alternative  
For win 7 os

what do I put the action as?

# How to Make an Auto-Hacking USB Drive

Crazy Leprecaun (/member/Crazy+Leprecaun/) in usb (/tag/type-id/category-technology/channel-rush/) hey rossy\_isabella how you doing what hacks does  
Download cyberblackhatinfiltrator do i mean what kind of hacks does he do and  
would he hack the systems of the scammers who ripped me off? basically  
I want him to hack them and get everything off their computers and  
destroy there hard drives or servers
